## Education

**University of California, Berkeley – Master of Information & Data Science, 2025**

**Cornell University, College of Engineering – Bachelor of Science in Electrical and Computer Engineering, 2022**

## Experience

**[IBM, Massachusetts – May 2021 - Present](#)**

**Senior Data Engineer; Cambridge, MA – April 2024 - Present**

- Designed, developed, and deployed business process management applications using Appian.
- Designed, developed, and deployed ETL pipeline applications using IBM DataStage.
- Created intuitive and user-friendly interfaces for BPM applications to facilitate easy navigation and use by non-technical users.
- Designed and implemented efficient data ingestion pipelines to collect data from various sources, ensuring the scalability and reliability of data storage solutions.
- Implemented security measures to protect data integrity and privacy, ensuring compliance with data protection regulations.
- Worked closely with business analysts, data scientists, and IT teams to define data requirements and deliver actionable insights.
- Continuously monitored data pipelines and performed optimizations to enhance performance and reduce costs.

**Data Engineer & BPM Application Developer; Cambridge, MA – October 2023 - April 2024**

- Designed, developed, and deployed business process management applications using Appian.
- Designed, developed, and deployed ETL pipeline applications using IBM DataStage.
- Created intuitive and user-friendly interfaces for BPM applications to facilitate easy navigation and use by non-technical users.
- Developed and optimized data processing pipelines using big data technologies to cleanse, structure, and enrich raw data into usable formats.
- Customized BPM software according to business needs, including configuring process models, rules, and notifications.
- Integrate new technologies and data management tools into the existing infrastructure to improve data processing and analytics capabilities.

**Associate Data Scientist; Cambridge, MA – October 2022 - October 2023**

- Wrote programs to cleanse and integrate data in an efficient and reusable manner using leading-edge and open-source tools such as Python, R, and TensorFlow, combined with IBM tools and our AI application suites.
- Worked in an Agile, collaborative environment, partnering with other scientists, engineers, consultants, and database administrators of all backgrounds and disciplines to bring analytical rigor and statistical methods to the challenges of predicting behaviors.
- Communicated with internal and external clients to understand and define business needs and appropriate modeling techniques to provide analytical solutions.
- Assisted in leading workshops to gather insight from users about how to improve applications.
- Evaluated modeling results and communicated the results to public sector audiences.

### **Client-Facing Technical Support CO-OP; Littleton & Lowell, MA – May 2021 - December 2021**

- Resolved support requests and debugged issues with the IBM InfoSphere Information Server (IIS) product.

### **Specialized Skills**

- Machine Learning
- Business Process Management (BPM)
- Government, Human Services & Healthcare Industry Experience
- Research
- Product Engineering

### **Licenses and Certifications**

- Appian Certified Associate Developer
- Neo4j Graph Data Science Certification
- Google Analytics Certification
- Azure AI Fundamentals Certification
- Azure AI Engineer Associate Certification
- AWS Partner Accreditation (Technical)
- Databricks Lakehouse Accreditation
- Databricks Generative AI Fundamentals Accreditation
- IBM Information Server - Datastage ETL Developer
- Solution Creation Expert Certification - Celonis
